Individual Membership Proposal

I. Background

The Healthcare Innovation Center, HIC, (www.hicpr.com) by CIRACET Corp. is a creative space designed for health professionals, scientists, industry leaders, and entrepreneurs to solve the operational challenges of medical care. HIC evolves as a private collaboration to promote healthcare technology solutions not readily available for the current health industry.

The HIC environment is a place of continuous collaboration and learning through diverse sources. In addition to hosting the development of several innovation projects from our top healthcare partners, in our facilities, we have co-working spaces, private offices, conference rooms, clinical setting simulation, and educational training rooms as well as our state-of-the-art HIC Presentation Hall.

II. Target

We aim to help forward-thinking organizations in the Healthcare Industry to seek and co-develop solutions leveraging new technologies and build innovation capabilities. HIC has a projection to impact the industry regularly through face to face and virtual events.

III. Purpose

To achieve significant change, we need to come together as industry members and reinforce the importance of coworking to encompass all aspects necessary to evolve. The increasing complexity of topics, services, and needs presents us with an opportunity for cross-organizational engagement and a wealth of data that will help us understand how we can come together to create value through patients, payers/providers, and services.

Knowing the importance of partnerships, we want to present a proposal to collaborate and create a valuable link to continue the hard work of innovating and improving the healthcare industry. Together we can make a change.

IV. Individual Membership

The Individual Membership intends to create a conglomerate within our network, facilitating dialogue for new ideas, strategies, and alliances between all HIClub members. This membership includes professionals who provide direct healthcare services, such as physicians, nurse practitioners, physician assistants, nurses, respiratory therapists, dentists, and pharmacists. HIC is looking to professionals who also work in academic training, research, and administration. The healthcare industry supports engineering disciplines such as biomedical, chemical, civil, computer, electrical, environmental, industrial, information, materials, mechanical, software, and systems engineering. Healthcare Engineering is emerging to resolve aspects of the prevention, diagnosis, treatment, and management of illness and preservation and improve health and wellness through the services offered by the medical and allied health professions.

The cost of the sponsorship is \$1,000 per year that must be renewed annually. (Alternative pricing and scope of work may be applied.) The proposed partnership will include the following:

- Listed as Individual Sponsor Member.
- Participate in sponsored HIC networking events/Special Interest Groups
- Introduction to existing Innovative Care Solutions portfolio.
- During networking events, Continued Education Certificates may be available at an extra cost.
- Opportunity to participate in Policy & Advocacy Meetings with HIC Steering Committee and Government Officials (or representatives of either group) when attainable.
- Prospect of being a literature reviewer of academics or research projects.
- Special discounts for HIC Conference and Business Hub.
- Special discounts for HIC Co-Working Space.
- **Access to Innovative Care Solutions** (at an extra cost).
 - Periodic innovation sessions between the Individual Member staff and HIC Subject Matter Experts (SMES) will be regularly programmed. The purpose of these sessions will be to filter members' current issues, characterize challenges that may need innovation. Jointly ideate several disruptive solutions, design accepted approaches, iteratively review prototypes, and devise potential final "Innovative Care solutions "(ICS)."
 - Project Management, development, and incubation of the approved solution are performed at an additional price.

- 
- Group or preferred purchasing from related medical suppliers associated with HIC; when available.
 - Portions of the Individual Membership fees will be devoted to research funding and academic scholarships for professionals interested in the Healthcare and Innovation field.

We hope to count on your support to enhance education in healthcare through our facilities, events, and sponsorships. It will be an invaluable position to be recognized as a champion in the progress of the new solutions.

On behalf of the Healthcare Innovation Center, we thank you for your support.
